

RAG Architecture Decision Record

Department: ENGINEERING

Category: ADR

Source: Synthetic Enterprise Knowledge Base

Audience: Internal staff with approved department access

Purpose

This document provides department-specific guidance for ENGINEERING staff and approved collaborators.

Key Requirements

- Streamlit and Teams are separate clients connected to the same FastAPI backend.
- SQLite remains the source of truth for metadata, ACL, audit, and versioning.
- Vector stores contain searchable chunks and duplicated filter metadata.
- The LLM receives only authorized retrieved context.

Review And Ownership

The ENGINEERING document owner reviews this content every 90 days or after a material process change.

Outdated versions should be archived before the replacement version is indexed.

RAG Test Notes

Queries about 'rag architecture decision record' should cite this source when the user has access to ENGINEERING.

If a user from another department lacks permission, the system should not use this content in the answer.
